Career Objective

B.Sc. Artificial Intelligence & Data Science student and Founder & Lead Developer of SASH AI, seeking an internship opportunity to apply data analytics, artificial intelligence, machine learning, and IT skills to real-world business and industrial applications in Japan. Experienced with Python, SQL, Power BI, FastAPI, and AI technologies, with hands-on projects in analytics, forecasting, OCR, and AI applications.

EDUCATION

KPR College of Arts, Science and Research

B.Sc. Artificial Intelligence & Data Science

Last Semester(%) : 76%

July 2025 – April 2028

Relevant Courses: Statistics, Machine Learning, Python Programming, Data Visualization, Database Management, Big Data Analytics

Clubs & Work Experience

Founder & Lead Developer — SASH AI

2026 – Present

Founded and lead development of SASH AI, an AI-powered Japanese learning platform combining AI tutoring, FSRS-6 spaced repetition, JLPT preparation, multimodal learning, and conversational voice AI.

Implement AI-assisted learning workflows, speech recognition, text-to-speech, personalized practice, and data-driven learning experiences.

Lead product architecture, feature development, testing, and iteration across the platform.

Data Science Intern — CodSoft

July 2026 – August 2026 | 4-week Virtual Internship

Completed a 4-week virtual Data Science internship through project-based assignments and practical data science tasks.

Applied Python, data analysis, and machine learning concepts to complete internship projects and deliverables.

Member of Case Studies Club at KPR College

- Participated in mini hackathons and case competitions focusing on data-driven problem solving.

Fund Raiser at Pawzz Foundation

Jan 2026

- Called and communicated with donors to raise funds for stray dog welfare initiatives, collecting ₹630 in donations.

Experience (continued)

Tata Data Visualisation: Empowering Business with Effective Insights Job Simulation on Forage
July 2026

- Completed a simulation involving creating data visualizations for Tata Consultancy Services
- Prepared 8+ questions for a meeting with client senior leadership
- Created visuals for data analysis to help executives with effective decision making

Deloitte Australia – Data Analytics Job Simulation (Forage)
Virtual Experience |
July 2026

- Completed a **data analytics job simulation** focused on solving real-world business problems using data.
- Cleaned and analyzed business datasets to identify trends and support data-driven decision-making.
- Created **interactive dashboards** and data visualizations to communicate insights to stakeholders.
- Prepared a client-ready presentation summarizing key findings and business recommendations.
- Applied **Excel, data visualization, and analytical thinking** throughout the project.

Courses & Certifications

Career Essentials in Data Analysis at Microsoft and Linkedin
Aug 2025
MySQL for Data Analysis at Maven Analytics
Jun 2026
Advanced Excel at Value Added Course
Jun 2026
EF SET English Certificate at EF SET
– Nov 2025
Maiyyam Data Analytics Certificate at Maiyyam
– Oct 2025

FutureSkills Prime — SB - Generative AI with Google Cloud Data (Gold)
Oct 2026
FutureSkills Prime — Digital Application Fundamentals - STEM (Gold)
Oct 2026
CodSoft — Data Science Virtual Internship (4 weeks)
Aug 2026

Technical Skills

Programming: Python, SQL, C++
Data Analytics: Pandas, NumPy, Matplotlib, Excel, Power BI, Google Sheets, Data Cleaning, Data Wrangling, EDA, Statistical Analysis
Machine Learning & AI: Machine Learning, Generative AI, LLMs, Prompt Engineering, AI Integration, OCR, Computer Vision
Backend & Web: FastAPI, REST APIs, HTML, CSS, JavaScript
Databases: MySQL, MongoDB, Supabase
Tools & Platforms: Git, GitHub, Jupyter Notebook, Google Colab, Linux

Academic / Personal Projects

Voice of Stones — Tamil Inscription Reader

• Developed an Machine Learning model to read and interpret historical Tamil inscriptions from images.

• Built an OCR and image-processing workflow to extract Tamil inscription text and improve accessibility of historical inscriptions.

• Designed a user-friendly interface for presenting extracted inscription content.

FitBuddy — AI Fitness Plan Generator

- Developed an AI-powered fitness planning application using Python, FastAPI, Gemini AI, and Supabase to generate personalized workout plans.
- Implemented structured AI generation, validation and fallback logic, plan adaptation, exercise replacement, progress tracking, and feedback-driven recommendations.
- Designed database-backed user profiles and plans with authentication, persistence, and row-level security (RLS).

NCR Ride Bookings Analysis – Power BI Dashboard

Aug 2025 – Aug 2025

- Built an interactive 3-page Power BI dashboard analyzing 150K ride bookings in NCR (2024). Created KPIs including Completion Rate, Cancellation %, Average VTAT, Revenue per km, and Ratings. Developed demand heatmaps, cancellations analysis, and payment behavior insights. Delivered an executive report with actionable recommendations for reducing cancellations, optimizing supply allocation, and improving customer experience.

Railway Passenger Satisfaction Analytics

May 2026 – Jun 2026

- Analyzed 94,000+ railway passenger records using Python, Pandas, Power BI, Power Query, and DAX. Performed end-to-end data cleaning, preprocessing, exploratory data analysis (EDA), correlation analysis, and delay impact analysis. Conducted customer segmentation comparing loyal vs. disloyal passengers and business vs. personal travelers. Key findings: onboard entertainment was the strongest satisfaction driver, digital services significantly influenced passenger experience, higher delays correlated with lower satisfaction, and loyal customers reported substantially higher satisfaction levels. Built an interactive 4-page Power BI dashboard delivering executive summaries, service quality insights, operational metrics, and actionable recommendations for stakeholders.

Japan Tourism Forecasting & Analytics

June 2026 – July 2026

Python, Power BI, Machine Learning

- Analyzed 20+ years of tourism data from the Japan National Tourism Organization.
- Built Random Forest and XGBoost forecasting models to predict monthly visitor arrivals.
- Designed a four-page interactive Power BI dashboard with executive KPIs, tourism trends, forecasting, and business recommendations.
- Achieved an R^2 score of **0.9366** using the Random Forest model.

Languages

- Japanese — Self-assessed N4 level (conversational comprehension and speaking)
- English (C1 (Advanced)),
